

AKIN DFQH_3D LED Strip Light

AKIN DFQH_3D is a single side illuminated dot-free strip light with 11mm illuminated width and integrated with soft honeycomb louvre. It can be top bended (R=50 mm) and side bended (R=200 mm), ideally for double curve applications. The integrated honeycomb louvre helps to cut the glare and increase the comfort level. It's an ideal linear light for shelving and skirting illumination especially on reflective surfaces.

AKIN 3D Bendable Honeycomb Anti-Glare Strip Light

This is a new type of light strip with a patented internal structure that enables the light strip to achieve both top and side bending. The linear honeycomb louvre design has an excellent anti-glare effect, creating soft and delicate lighting.

Anti-glare

3D Bendable

Excellent flexibility

Sufficient brightness

Length customization service available

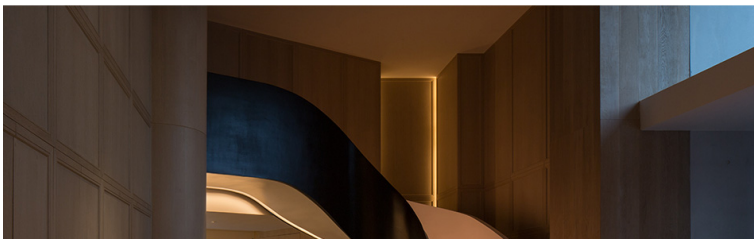

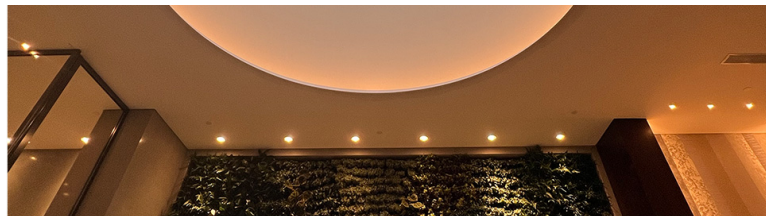

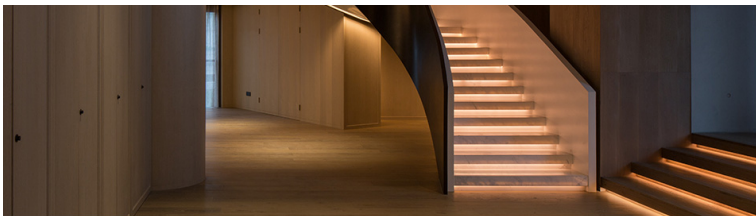

Seamless connection

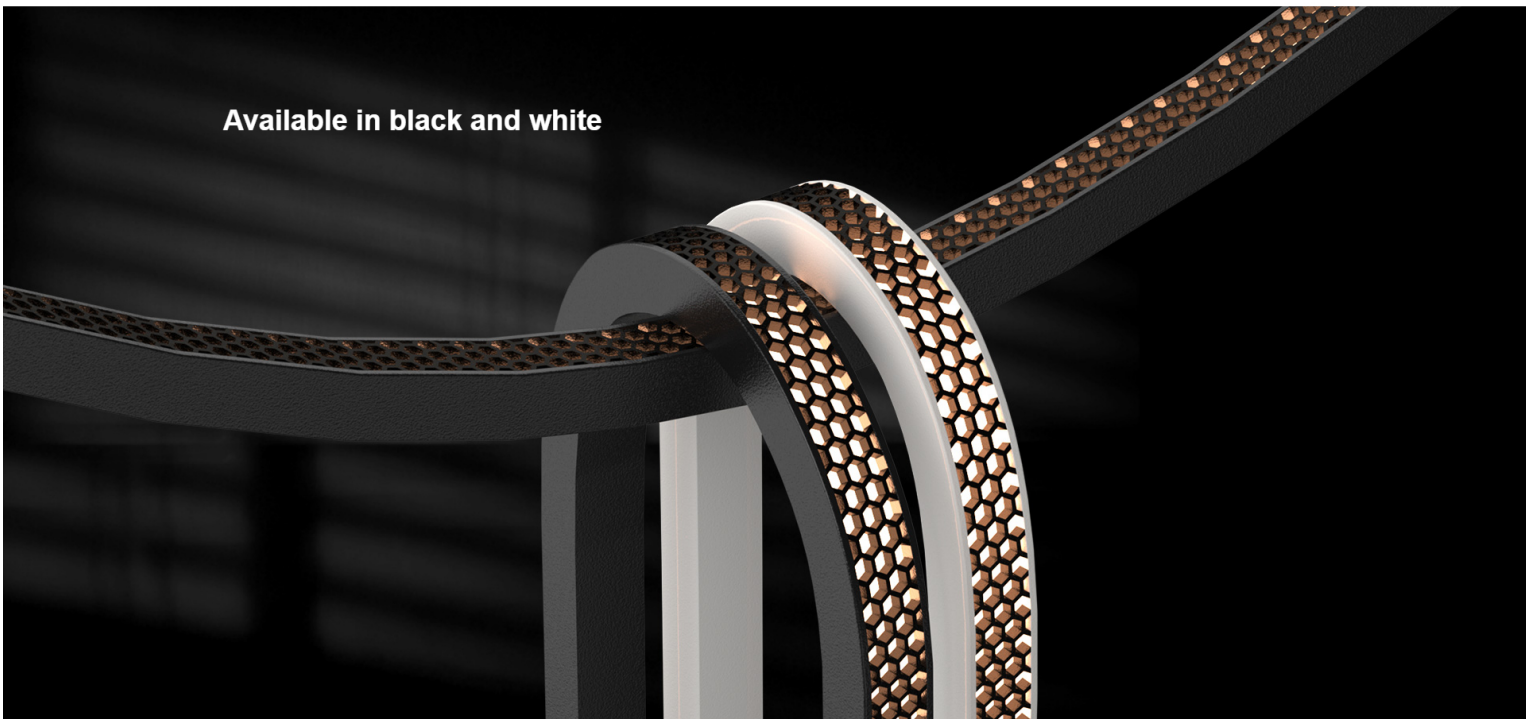

Special designed for various applications in hospitality lighting

Special anti-glare design, especially suitable for areas with high anti-glare requirements such as guest rooms, spas and reflective surfaces.

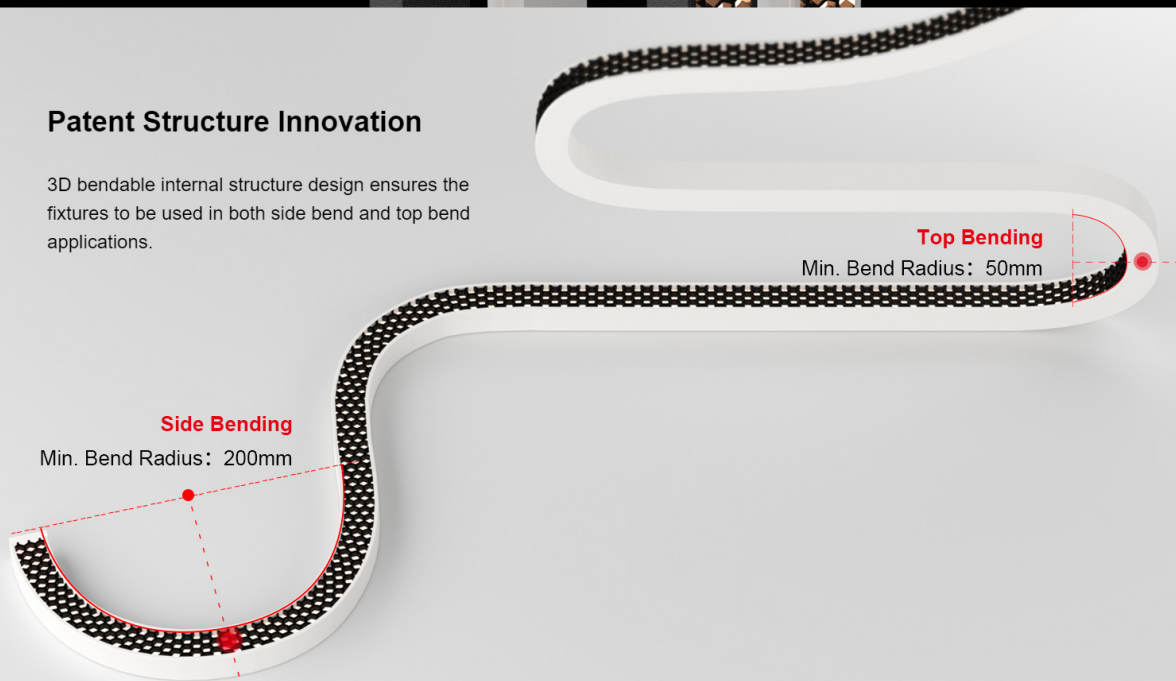

Available in black and white

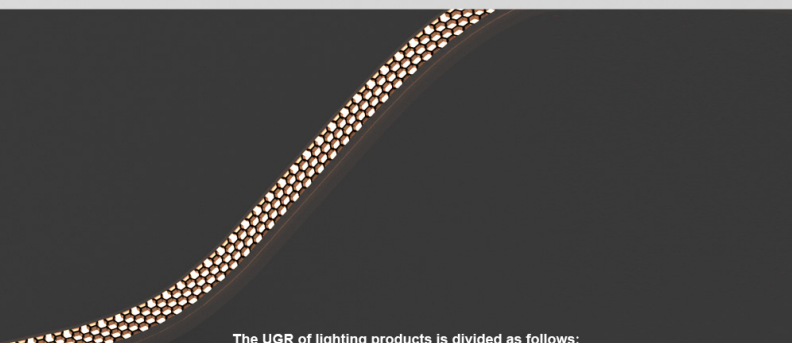

Patent Structure Innovation

3D bendable internal structure design ensures the fixtures to be used in both side bend and top bend applications.

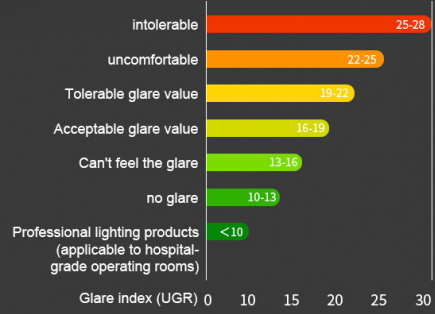

Anti-glare design ensures a comfortable visual experience

UGR \leq 15, no direct glare, eye-friendly

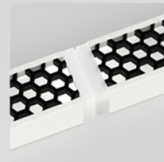

The UGR of lighting products is divided as follows:

Customized length, seamless connection

Aero provides length customization services for projects, and all our strip lights can be seamlessly connected for even brightness.

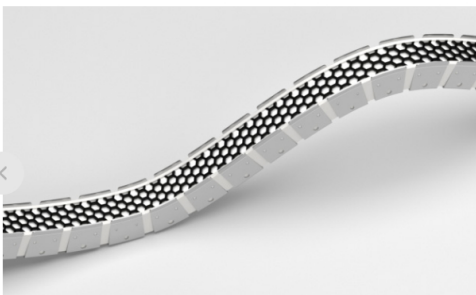

Ultra thin plug with high light transmittance

Design of hidden outlet at the bottom

Various accessories

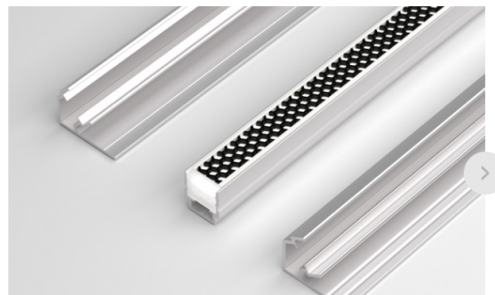

For different application requirement.
