STICK

www.unilamp.co.th/en/p/stick

STICK is cylindrical-shaped light column with symmetrical light distribution. The LED light source in combination with a unique 250 degree wide spread lens provides uniform light. It is available with the choices of three different color temperatures from 2700K, 3000K or 4000K in high color consistency and remarkable color rendering index.

STICK with HID light source and E27 holder for retrofit lamps are also available. The internal glare suppression louver improves the lighting quality by limiting the upward light emission.

STICK is generally installed in the walkways, gardens, parks, commercial areas and open spaces to provide the general lighting from mid-high level. The recommended mounting height is between 3 – 4 meters above the ground.

STICK Direct is an evolution of the existing STICK product line. The cylindrical shaped luminaire is available with symmetric or asymmetric light distribution. The efficacy of STICK has been improved to at least 120lm/W and virtually upright free.

The ambient temperature is rated up to 50°C. STICK direct is available as light column or pole-top light. This makes STICK direct a great choice for new installations and site upgrades.

STICK Direct Light Column

Specification

- Designed, Manufactured and tested according to IEC 60598.
- LM6 Die Cast Aluminium and Extruded Aluminium body.
- Stainless steel screws.
- Nano Ceramic surface conversion.
- Double layer coating.
- PC protective cover.
- Anodized aluminium louvers.
- Post-cured silicone gasket.
- High quality LED module and driver.
- Installation must be carried out according to the enclosed product manual.

Available Color

Black	[replace the last 2 digits of ordering code with O1]
Graphite	[replace the last 2 digits of ordering code with O2]
Dark Grey	[replace the last 2 digits of ordering code with O3]
